FINO FRANKLIN JOHN BOSCO

Chicago, Illinois • +1(312) 285-6729 • finofranklin@gmail.com
Portfolio: nextfino.netlify.app • LinkedIn: linkedin.com/in/5fino-franklin • GitHub: github.com/ItsDarker

PROFESSIONAL SUMMARY

Security-focused engineer pursuing MS in Cybersecurity with hands-on experience in identity and access management, SIEM deployment, DevSecOps, and secure development. Expertise in Active Directory, vulnerability scanning, GCP IAM, and security automation. Passionate about continuous learning at the intersection of offensive security and defensive architecture.

CORE COMPETENCIES

- **Security & IAM**: Identity & Access Management (IAM), Active Directory, RBAC, MFA, NIST Framework, NIST Cybersecurity Framework, Access Control, Privilege Escalation Prevention, Zero Trust Architecture
- **SIEM & Monitoring**: Wazuh SIEM, Splunk, Log Analysis, Security Visibility, Threat Detection, Anomaly Detection, Event Correlation, Vulnerability Scanning, Audit Logging
- **Threat Analysis & Frameworks**: MITRE ATT&CK, OWASP Top 10, CIS Controls, Threat Modeling, Threat Intelligence, ThreatDragon, Risk Assessment, Incident Classification
- **Penetration Testing & Security Tools**: Burp Suite, OWASP ZAP, Nmap, Metasploit, Wireshark, Kali Linux, Nikto, Hydra, SQLmap, Hashcat, John the Ripper, Aircrack-ng
- **Endpoint & Network Security**: Microsoft Defender XDR, Endpoint Detection & Response (EDR), Intrusion Detection System (IDS), Intrusion Prevention System (IPS), Firewall Management, VPN, DLP
- **Cloud & Application Security**: GCP Security, AWS Security, API Security, OWASP Secure Coding, Web Application Firewall (WAF), Container Security, DevSecOps
- **Development & Automation**: Python 3, Bash, PowerShell, JavaScript, React.js, Next.js, RESTful APIs, MySQL, PostgreSQL, SQLite, Git, GitHub, CI/CD
- **Incident Response & Forensics**: Incident Response, Digital Forensics, Malware Analysis, Root Cause Analysis, Post-Incident Review, Chain of Custody, Evidence Handling, Log Preservation
- **Certifications**: CNSP (Certified Network Security Practitioner), CSEH+ (Certified Ethical Hacker), Security+, Google Cybersecurity Certificate

PROFESSIONAL EXPERIENCE

Full-Stack DevSecOps Intern *January 2026 – Present*
Geo Digital Partners • Toronto, ON

- Developed secure websites by implementing best practices for security measures across multiple applications and environments
- Contributed to construction project management dashboard, enhancing clarity and efficiency for stakeholder communication and project tracking
- Managed hosting environments in GCP, implementing IAM policies and security controls to ensure proper access management and compliance
- Collaborated with team members to streamline processes, reducing confusion during project phases and improving overall workflow efficiency

Junior Cybersecurity Intern *September – December 2025*
Lumena Energy • Chicago, IL

- Configured and managed Active Directory, creating users, roles, and group policies while ensuring compliance through comprehensive audit log reviews
- Integrated Wazuh SIEM to enhance security visibility across servers, supporting proactive threat detection and real-time security monitoring
- Assisted in implementing NIST cybersecurity controls, translating them into actionable organizational policies and security standards
- Conducted vulnerability scans and maintained comprehensive asset inventory for security operations and risk management

Full-Stack Developer *January – June 2024*
Anju Technology • Chennai, India

- Developed responsive interfaces using HTML, CSS, JavaScript, React.js, and Next.js with focus on user experience and accessibility
- Built and integrated RESTful APIs for seamless frontend-backend communication, ensuring data integrity and security
- Collaborated with cross-functional teams to deliver client-focused solutions within project deadlines and budget constraints
- Gained hands-on experience in full software development lifecycle from requirements gathering through deployment and maintenance

Python Developer *January – March 2024*
Spiro Prime Education Institutes • Chennai, India

- Designed and implemented backend modules and APIs using Python for web and mobile integration, ensuring robust functionality
- Developed automation tools to streamline workflows, enhancing operational efficiency and reducing manual processing overhead
- Managed and queried structured data using MySQL, PostgreSQL, and SQLite, implementing secure database management

practices

Frontend Developer *September – November 2022*

Coffee Inc. • Chennai, India

- Developed front-end components in React and JavaScript to improve user experience and interface responsiveness
- Integrated APIs with backend services, ensuring smooth data flow and seamless system integration across platforms

Front Desk Assistant *January 2026 – Present*

Illinois Institute of Technology • Chicago, IL

- Assisted the Department of Computer Science by providing technical support to students and staff
- Managed inventory of campus devices, ensuring availability and functionality
- Fostered a welcoming environment at the front desk, enhancing student and staff interactions

Esports Event Coordinator *August 2025 – Present*

Illinois Institute of Technology • Chicago, IL

- Coordinated and managed competitive gaming events to enhance community engagement
- Oversaw tournament operations while promoting inclusivity within the esports ecosystem
- Leveraged strategic communication and organizational skills to deliver seamless events
- Cultivated talent and enriched the campus esports culture at Illinois Institute of Technology

PROJECTS & SECURITY RESEARCH

Cloud Controls & Logging Simulation

Configured AWS IAM policies, logging, and monitoring controls; reviewed access configurations for risk and compliance considerations. Demonstrated knowledge of cloud security best practices, compliance frameworks, and identity governance in cloud environments. Technologies: AWS, IAM, CloudTrail, Security Hub.

AI Threat Intelligence Platform

Built an AI-powered threat intelligence system aggregating OSINT feeds, applying machine learning with Neo4j graph-based correlation to detect, analyze, and visualize phishing campaigns and attacker infrastructure. Developed capabilities in threat modeling, intelligence fusion, and advanced security analytics. Technologies: Python, Machine Learning, Neo4j, OSINT.

Real-Time Network Intrusion Prevention System (IPS)

Developed a Python-based IPS to capture and analyze live network traffic, detect malicious activity, perform port scanning, and block suspicious connections in real time. Reinforced knowledge of IDS/IPS technologies, network-based threat detection, and automated response mechanisms. Technologies: Python, Scapy, Network Analysis, Real-time Processing.

Federated Learning Privacy Attack Framework

Implemented property inference attacks against Federated Learning models in smart home IoT networks, including shadow model training, gradient analysis, and evaluation of privacy-preserving defenses. Advanced understanding of privacy-critical security architectures and emerging threat vectors. Technologies: TensorFlow, Privacy Attacks, Machine Learning Security.

Cyber-Attack Classification Using Supervised ML

Built a machine learning pipeline using Random Forest and Naïve Bayes algorithms to classify network traffic attacks, supporting threat detection, alert prioritization, and security analytics. Achieved 94% classification accuracy supporting SOC decision-making and incident prioritization. Available at github.com/ItsDarker/Cyber-Attack-Classification-Using-Supervised-ML. Technologies: Python, Scikit-learn, Random Forest, Naïve Bayes.

HANDS-ON SECURITY PRACTICE & CTF EXPERIENCE

Actively completed security challenges and labs on HackTheBox, OverTheWire, and PicoCTF platforms. Demonstrated practical application of offensive security techniques including system exploitation, privilege escalation detection, cryptographic challenges, and post-exploitation activities. Engaged in capture-the-flag (CTF) competitions and security research, reinforcing understanding of real-world attack vectors and defensive countermeasures. This hands-on experience complements formal education with practical vulnerability assessment and exploitation skills critical for cybersecurity professionals. Active participation in competitive security research and continuous learning through industry-standard security challenges.

EDUCATION

Master of Science – Cybersecurity *August 2024 – May 2026*

Illinois Institute of Technology • Chicago, IL • GPA: 3.55/4

Specialization: Information Security, Cryptography, Advanced Computer Security, Penetration Testing, Ethical Hacking

Bachelor of Engineering – Computer Science & Engineering *August 2020 – May 2024*

Anna University Chennai • Chennai, India • GPA: 3.44/4

LANGUAGES

English (Full Professional Proficiency), Tamil (Native Language, Full Proficiency)
